

Attention Report on Carcinogens

Federal Register Notice: (74FR67883 - 67884)

Name: Mr. Bob Kerr

Email: [REDACTED]

Company / Affiliation: Private Citizen

Comments Submitted on Behalf of a Sponsoring Organization?: no

Organization Name:

Joined the NTP Listserv? no

Comments: I am a retired chemist. I worked from March of 1948 until January of 1986 for Celanese Chemical Company at Bishop, Texas. I worked with formaldehyde and formaldehyde polymers during all of that time.

I am unable to recall any of my fellow employees who were diagnosed with cancers associated with formaldehyde.

Formaldehyde is a dangerous chemical and it should be used with proper care; however, I question calling it a carcinogen.

Thank you for an opportunity to comment.
